Endoscope Condition Auditing Services

Let us come to you. Obtain a snapshot of your Scope Inventory Condition by utilising our Scope Condition Auditing Service.

Using the latest available technology brought together in one unit, ScopeControl is the only independent optical fitness for purpose auditing device available in the UK today.

Our Endoscope Condition Auditing Service offers the following key deliverables;

- Introduces a testing log, testing can be initiated with us on a set schedule determined by you
- Produces accurate data on the optical condition of rigid and semi-rigid endoscopes in circulation*
- Offers complete visibility of the scopes in service, providing better management, confidence and reduced operating costs
- Can aid and support budgetary planning, identifies the scopes that need repairing or replacing by means of a reliably repeatable and independent testing system
- Reports will create single source of data, such as inventory types, serial numbers, makes and models and service life

Internal snapshots of each device are taken and saved against each test for each serial number and are included in reports as standard.

In addition, our experienced operatives undertake a 10-point external visual inspection of the scope to ensure both internal and external defects are completely covered with each test.

Your assets don't leave site as we bring our service to you. If you are looking for a truly independent choice for Scope Condition Auditing then this service is for you.

We don't manufacture scopes! Our interest is purely in providing you with accurate technical data about each and every scope in your inventory.*

To find out more including a sample of the reports available please get in touch with us.

Your inventory will be tested on 6 key parameters;

**FIELD OF
VIEW**

**COLOUR
CORRECTNESS**

**VIEW
ANGLE**

**LIGHT
FIBRES**

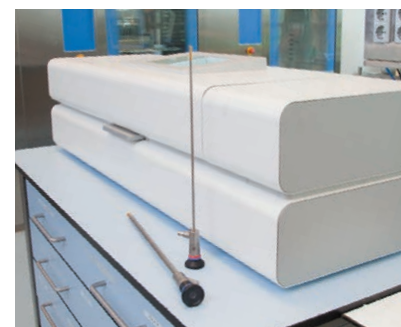

**LIGHT
TRANSMISSION**

FOCUS

*All scopes made available on the day are tested regardless of numbers, to cover full inventory multiple days are recommended to ensure full cycle of testing.

Preventative Maintenance Services

Why not introduce a Preventative Maintenance plan for your Scope inventory?

Using your live data derived from the Scope Condition Audit, we will create a tailored plan to suit your exact needs taking a holistic view of your full Scope inventory to ensure we maximise uptime across the devices.

Turn your Scope repair process on its head and dramatically improve the quality of scopes in circulation, by systematically repairing scopes that test as Amber during our Auditing Service over an agreed period of time, ensuring that they are targeted and repaired before they fail.

To find out more about this service please get in touch with us.

Complimentary Products and Services

Bolton Surgical offer a number of associated products and services to enhance our Endoscope Repair offering;

- Supply, Testing and Repair of Fibre Optic Light Cables in many colours, bundle sizes and connector types
- Supply and Repair of Sterilisation Baskets and Holding Devices
- Testing and Repair of Sheaths and a wide range of Laparoscopic Instrumentation

We're here to help! We offer a seamless service for associated products, send your Endoscope together with its Fibre Optic Cable and we will test, repair or replace for you giving complete peace of mind.
